With the support of the Erasmus+ Programme of the European Union

VIII UKRAINIAN-POLISH SCIENTIFIC FORUM

NEW AGENDA FOR EUROPE
AND THE EUROPEAN UNION :
causes – directions – priority goals

Ukraine, Lviv, May 18-19, 2023

DEAR COLLEAGUES!

We invite you to participate in the VIII Ukrainian-Polish Scientific Forum, which will be held in Lviv on May 18-19, 2023 as part of the ERASMUS+ J. Monnet Project “EU Eastern Partnership Initiative – Opportunities for Ukraine”.

The event is organized by the Institute of Humanities and Social Sciences of the Lviv Polytechnic National University (Ukraine) and the Institute of Political Science of the University of Warmia and Mazury in Olsztyn (Poland). Traditionally, the Forum is an effective platform for establishing Ukrainian-Polish relations within the educational and scientific space, civil society institutions, and public authorities of different levels. The purpose of this year’s Forum is to discuss topical issues of forming a new agenda for Europe and the European Union under conditions of full-scale Russian aggression; to consider promising formats of European cooperation in the fields of politics, democracy and human rights, economics, security, ecology and climate, culture, education, etc.; to search for effective cooperation mechanisms facilitating European integration of Ukraine as a candidate for EU membership.

Unfortunately, due to the large-scale war unleashed by Russia in Ukraine, the VIII Ukrainian-Polish Scientific Forum will be held online as the organizers seek to ensure that scientific cooperation is safe and continues to unite researchers from Ukraine, Poland, and other countries.

We invite scholars, educators and students, representatives of state authorities and civil society, whose research, teaching or professional activity are focused on issues of Ukrainian-Polish relations, multidimensional European integration, and development of systems of international security.

THEMATIC AREAS OF THE FORUM:

- ✓ The influence of Russian aggression on the agenda of Europe and the European Union.
- ✓ Prospects for the development of EU’s Eastern Policy in the conditions of modern geopolitical challenges.
- ✓ New formats of European cooperation: from economy to security.
- ✓ The importance of CEE countries in shaping a new political and security order in Europe.
- ✓ The role of diplomacy in the settlement of the current security crisis.
- ✓ Ukrainian-Polish strategic cooperation in the face of modern geopolitical threats.
- ✓ The EU and European partners in support of Ukraine and its post-war recovery.
- ✓ European and Euro-Atlantic perspective of Ukraine in the context of the large-scale Russian invasion.
- ✓ Transformation of policy of the Eastern Partnership countries in time of the Russian-Ukrainian war.

**Two ROUND TABLES
will be held within the Forum:**

- 1. The role of local self-government bodies in overcoming the consequences of the large-scale Russian aggression against Ukraine**
- 2. Regional dimension initiatives of the EU Eastern Partnership: challenges, achievements and prospects**
