

CONTENTS

- 1 Bolkot P. A., Kharchyshyn B. M., Khaj M. V. ,**
Mathematical model of determination of magnetic conductance of angle-data transmitter with transverse magnetic system
- 10 Havdo I. R.**
Mathematical model of magnetic state of permanent magnet direct current motor
- 17 Gapanovych V. G., Bakhor Z. M.**
Experimental investigation of the dynamic processes of a static thyristor compensator for a mine load power supply system
- 25 Kutsyk A. S., Plakhtyna O. G.**
Real-time mathematical modelling of asynchronous generator with voltage inverter in rotor circuit
- 36 Lysiak V. H., Oliinyk M. Yo., Sabat M. B., Shelekh Y. L.**
Modeling of steady-state modes of the electrical network from the synchronous electric drive of hydraulic loading
- 46 Misurenko V. O., Semeniuk M. B.**
Research of the possibilities of using the ATV340 frequency converter for speed synchronization mechanically unconnected electrical drives
- 54 Tkachuk V. I., Bilyakovskyy I. Ye., Kasha L. V.**
Switched reluctance motor with energy capacity storage in system with autonomus limited power supplingi
- 63 Chaban A. V., Lysiak H. M., Levoniuk V. R.**
Mathematical modeling switching electromagnetic processes in the long power line in the automatic reclosing cycle
- 74 Shchur I. Z., Dzoba T. Y., Holubovskyy P. Y.**
Human-machine controlling of one-axis two-wheel personal electric vehicle in the case of liner movement
- 85 Yatsun M. A.**
Initial tension of local primary internal eddy current transformer of transformer type is in a electric conduction ferromagnetic pipe
- 92 Chaban V. Yo., Krokhmalnyi B. I.**
Singular problems in electric and mechanics tasks at idealization mathematical description
