

CONTENTS

- 1 Andriychuk M.**
Modeling the plane radiation structures consisting of discrete elements
- 11 Belej O., Kolesnyk K.**
Possibility of applying smartphones for positioning in the middle of the room
- 19 Holovata S.**
Mathematical modeling of area boundary of biaxial absolutely elastic states of wood
- 31 Holovatsky R., Lobur M.**
Determination of basic parameters and their boundary conditions of modern passive infrared motion detectors
- 43 Kosobutsky P.**
Methodical aspects of statistical modeling of two-dimensional systems of random variables
- 58 Sinkevych O., Monastyrskii L., Sokolovskii B., Boyko Ya.**
Estimation of effective thermal parameters of heating sources based on dynamic measurements in smart home
- 67 Tymoshchuk P.**
A model of parallel sorting neural network of discrete-time
- 73 Kosobutsky P., Nestor N.**
The formulas for sum of products of sequences associated with the metallic means
