

CONTENTS

- 1 Sokolovskyy Ya., Levkovich M., Kaspryshyn Ya.**
Research and mathematical modeling of fractional-differential rheological models
- 11 Kosoboutskyy P., Karkulovska M.**
Modeling of atomic systems and positioning of elements of noble gases of the periodic table by proportional division method
- 17 Kolesnyk K.**
Simulation modeling of movement of industrial robot manipulator In the matlab program
- 21 Kosobutskyy P., Lobur M., Matviiv-Lozynska Yu.**
Method of statistical imitation, its creator S. Ulam and basic principles of application for random processes modeling
- 31 Ruslan Holovatskyy, Mykhaylo Lobur**
Determination of boundary conditions for the radiation pattern of a microelectro-optical intelligent passive infrared motion detector
- 37 Kosobutskyy P., Karkulovska M, Losynska Yu.**
Regularities of numbers in the fibonacci triangle constructed on the degree transformations of a square three members
- 45 Stankevych O., Stankevych N.**
Research of acoustic emissions from the system of complanary cracks
- 51 Yovbak A., Farmaha I.**
Development and research of the automated methods for assurance user's effective performance
- 55 Stakhiv V., Matviykyv O., Klimkovich T., Podtserkovny V.**
Modeling and research of active rotary micromixer for microfluid devices
- 61 Farmaha I., Hadomskyy V.**
System for analysis, research and forecast of events in discrete time data sequences
- 67 Stankevych O.**
Mathematical modeling of elastic wave propagation in a body with a defect
