

CONTENTS

- 1 Biletskyi R., Lozynskyy O., Biletskyi Y., Tsiapa B.**
Analysis of Lyapunov matrices' application methods
for optimization of stationary dynamic systems
- 8 Biliakovskyy I., Tkachuk V., Kasha L., Khai M.**
Elements of thermal calculus of components
in electromechanical brushless converter with open-pole stator
and external rotor with permanent magnets
- 17 Varetsky Y.**
A method of power loss assessment in low voltage cables
for industrial electrical grids
- 27 Vihuro M., Malyar A.**
Solving the forward kinematics problem
for a welding manipulator with six degrees of freedom
- 35 Kutsyk A., Semeniuk M.**
An influence of a current compounding on the behavior
of a synchronous generator with a brushless excitation system during
a terminal-voltage variation
- 43 Levoniuk V.**
Mathematical modeling of transition processes
in the high voltage transmission line in short circuit modes
- 52 Lysiak G., Malinovskiy A., Pastukh O.**
The modes of the power supply scheme
of own needs during start-up of the power units
with an additional working transformer
- 62 Marushchak Ya., Pavlish V.**
Comparative analysis of systems
thyristor voltage converter –
asynchronous motor with serial and parallel adjustment
- 74 Moroz V., Yanchak T.-M.**
The influence of limited bit on the implementation
of the transfer in digital system
- 87 Shchur I., Halaiko T., Dzoba T.**
Economic efficiency of a solar power plant
in an individual household under different scenarios
of green tariff dynamics
