

CONTENTS

- 1 Artur Budzyński,
Aleksander Śladkowski**
Forecasting fuel consumption in means of transport with the use of machine learning
- 10 Viktoriia Kotenko**
Application of algorithmic models of machine learning to the freight transportation process
- 22 Mykola Zhuk, Halyna Pivtorak,
Ivanna Gits, Mariana Kozak**
Application of bayesian networks to estimate the probability of a transfer at a public transport stop
- 33 Viktoriia Nykonchuk,
Iuliia Samoilyk,
Svitlana Pashkevych**
Research of the specificity of the development of international sea container transportation
- 41 Maksym Afonin,
Mykola Postranskyy**
Patterns of changes in the acoustic characteristics on public transport linear segments
- 52 Vasyl Mateichyk, Mirosław Śmieszek,
Nataliia Kostian**
Evaluation of transport system configuration by efficiency indicators
- 63 Taras Postranskyy, Kateryna Khoreva**
The influence of the traffic light's permissive signal share on the duration of traffic delays
- 72 Bohdan Kindratskyy, Roman Litvin**
The influence of friction between elements of dual-mass flywheel on oscillatory phenomena in a car transmission
- 85 Grzegorz Karoń, Ryszard Janecki,
Jerzy Mikulski**
Selected issues of systems engineering methodology in the design of transport systems
- 102 AUTHORS**
