

CONTENTS

- 1 Bybyk R., Nakonechnyi Y.**
Research on the impact of electromagnetic interference on the functioning of communication and radar systems
- 15 Harasymchuk O., Partyka A., Nyemkova E., Sovyn Y., Dudykevych V.**
Development of a method for investigating cybercrimes by the type of ransomware using artificial intelligence models in the information security management system of critical infrastructure
- 26 Horpenyuk A., Luzhetska N., Horpenyuk M.**
Research and improvement of computing algorithms for calculating the trigonometrical coefficients of the hashing algorithm MD5
- 36 Deineka O., Bortnik L.**
Methodology for collecting, processing, storing, and classifying data in accordance with soc2 type2 requirements
- 44 Dudykevych V., Mykytyn H., Bortnik L., Stosyk T.**
Security methodology of cyber-physical systems and the internet of things in intellectualization of infrastructure objects
- 54 Zaiets I., Brydinskyi V., Sabodashko D., Khoma Yu., Ruda Kh., Shved M.**
Utilization of voice embeddings in integrated systems for speaker diarization and malicious actor detection
- 67 Koval O., Harasymchuk O.**
Development of a hybrid method for data Warehouse construction
- 81 Kret T.**
Approaches to threat modeling in the creation of a comprehensive information security system for a multi-level intelligent control systems
- 89 Kurii Y., Opirskyy I.**
Overview of the cis benchmarks usage for fulfilling the requirements from international standard ISO/IEC27001:2022
- 99 Kuten R., Syniavskiy O.**
Methods and means of ensuring stability and protection of radio communications in a complex electromagnetic environment
- 108 Matseniuk Y., Partyka A.**
The concept of automated compliance verification as the foundation of a fundamental cloud security model
- 124 Mykytyn H., Ruda K.**
Conceptual approach to detecting deepfake modifications of biometric images using neural networks
- 133 Mykhaylova O., Stefankiv A., Nakonechny T.**
Security analysis of modern wi-fi network protection protocols: assessment of WPA3 protocol resistance during attacks based on dragonblood utility
- 148 Mychuda Z., Mychuda L, Yelisieieva H.**
Recurrent logarithmic analog-digital converters with a constant logarithm base
- 155 Syrotynskyi R., Tyshyk I.**
Improvement the security of the enterprise's network infrastructure in conditions of modern challenges and limited resources
- 165 Fedynyshyn T., Mykhaylova O.**
Artificial intelligence techniques application in the mobile device data analysis to identify person-of-interest
