CONTENTS

INFOCOMMUNICATION SYSTEMS AND TECHNOLOGIES

1 Klymash M., Balkovskyi N., Shpur O.
Hybrid model of network anomalies detection using machine learning

15 Yeremenko O., Savchenko R., Yakovenko K., Shestopalov S.
Study of reliability and fault tolerance management in information and communication networks: modeling and testing of default gateway redundancy protocols

34 Kyryk M., Maruniak S., T. Andrukhiv
Shap-based evaluation of feature importance in BGP anomaly detection models

44 Brych M., Kovalisko O., Balias I.
Application of machine learning for user sentiment analysis in information and communication systems

55 Eliseev Ye.
Method reconstruction segmented video data stream by normalized data sets in spectral-parametric space

64 Zablotskyi S., Pohranychnyi V., Tarasenko A., Kolodiy R.
Optimization of the routing process in distributed networks using machine learning

75 Lutsiuk A.
Efficiency of llm instruction formats for class imbalance problems in training data for predictive monitoring systems

82 Pyrih Ya., Pyrih Yu.
Investigation of sensor node placement on a plane using a genetic algorithm

89 Drozd B.
The system for automated data collection, processing and sending in a smart home as a component of IIOT

97 Pastukh V., Beshley M., Beshley H.
Development of a mobile cyber-physical system for radiation monitoring and analytics in Ukraine

RADIOELECTRONIC

109 Kolodchak I., Tchaikovskyi I., Chornyi D.
Synthesis of gold's code ensembles for use in cellular networks, navigation and pulsed radar

125 Horbatyi I., Usatyi O.
Investigation of spread spectrum signal analysis methods in modern communication systems

136 Ozirkovskyy L., Volochiy B., Husiak B., Zmysnyi M.
Defining the safety indicators of a unrecovery fault-tolerant safety critical system by the state space method

ELECTRONICS AND ENGINEERING

145 Barylo H., Holiaka R., Brych P., Pavlenko M., Onutchak T.
Modeling of the signal converter for photodiode sensor devices

154 Fechan A., Khoverko Yu., Dzhumelia E., Dalyavskii V.
Modeling of the signal converter for photodiode sensor devices

162 Fitio V., Prokopets D., Yaremchuk I.
Quasi-resonant absorption of te polarized waves by metal-dielectric gratings
