

# CONTENTS

- 1 Serny Klaus**  
Justification of architecture for intelligent agnostic multimodal transportation
  
- 9 Hrytsun Oleh, Sydorov Dmytro**  
Research on the speed mode of vehicles in dedicated lanes
  
- 23 Onwuegbuchunam Donatus Eberechukwu, Amuji Harrison Obiora, Ogwude Innocent Chuka, Nnadi Kenneth Ugwu, Okeke Kenneth Okechukwu, Bassey Asuquo Okon, Mustapha Abdulmalik Muhammad**  
Damage-based cost recovery and equitable tolling: a Shapley value model linking ESAL factors to highway fee structures in Nigeria
  
- 33 Khomin Nazar**  
Optimization of driver work schedule to perform a specified volume of intercity freight transportation
  
- 46 Krivda Vitaliy, Sakno Olha, Abramchuk Fedir, Haiek Yevhen, Kornilenko Kostiantyn, Moskalenko Anna**  
An enhanced tire rolling model for improving stability on low-friction surfaces
  
- 58 Sakhno Volodymyr, Yachenko Dmutro, Murovanyi Igor, Kotenko Andrii**  
Research on the maneuverability of an articulated bus on a physical model
  
- 67 Bandrivskyi Pavlo, Voznyak Oleh**  
The influence of tariffs on passenger choice of transportation mode in a suburban connection
  
- 78 Batih Andrii, Pulariia Andrii, Tereshchak Yuriy**  
Analysis of rolling stock coupling designs and technologies for the implementation of international railway operations between Ukraine and the European Union
  
- 91 AUTHORS**
