

# CONTENTS

- 1 Vovchak O., Veres Z.**  
Modeling the block formation process in blockchain and its impact on scalability
- 15 Hrytsko T. L., Lenskiy D., Hlukhov V. S.**  
Review of the capabilities of the jpeg-ls algorithm for its use with earth surface scanners
- 26 Danyliuk A. H.**  
Application of ant colony optimization algorithm in road traffic control
- 35 Darienko D., Kohut N.**  
Docker container image scanning methods on the subject of security vulnerabilities
- 44 Dzelendzyak U., Fedyniak I., Dziuba Y.**  
System of remote control and management of vehicle functions
- 50 Yelisieieva H. S.**  
Logarithmic analog-digital converters. review
- 72 Zamroz P. I., Morozov Yu. V.**  
Large language models and personal information: security issues and solutions through anonymization
- 82 Ivaniuk O. O., Denysenko N. S.**  
Analysis of the features of secure data processing in blockchain technology based on an experimental network
- 93 Klushyn Y.**  
Specialized software platform for analysis of information in data stores
- 107 Kovalyshyn M. Y., Paramud Y. S.**  
Web application for warehouse management system
- 122 Koniukhov V. D.**  
Ensemble methods based on centering for image segmentation
- 131 Maksymovych M., Mychuda L.**  
Role, problems, and methods of software security testing automation
- 141 Maltsev E. E., Muliarevych O. V.**  
Evaluation of efficiency and performance of serialization formats for distributed systems
- 158 Muzychenko A., Dunets R.**  
Selection and implementation of navigation methods for unmanned aerial vehicles on modern computer components
- 171 Pavlyk S. V., Lashko O. L., Kushnir D. O.**  
Principles of designing and implementing system of automated file deletion and control for windows os
- 179 Pavliv A. S.**  
Anonymization of data using blockchain technology: a model for data lifecycle management to ensure transparency and compliance with GDPR
- 189 Popovych B. R., Popovych R. B.**  
Program implementation of cryptographic primitives
- 197 Pukach A. I., Teslyuk V. M.**  
Development a multifactorial portrait model of software complexes' supporting subjects, using artificial neural networks
- 208 Sydorko D., Glukhov V. S.**  
Program implementation of methods for analysis and verification of technical reports
- 222 Stepanov O. V., Klym H. I.**  
Methodology of implementation of information systems using micro interfaces to increase quality and speed
- 232 Fastiuk Y., Huzynets N.**  
Optimization of the algorithm flow graph width in neural networks to reduce use of processor elements
- 242 Tsiunyk B. S., Muliarevych O. V.**  
Performance evaluation and optimization of YOLOV8 neural network models for target recognition
- 252 Chaus I. V., Marusenкова T. A.**  
Front-end framework for building applications with adaptive user interfaces using machine learning methods
- 268 Yurchak I. Yu., Kychuk O. O., Oksentyuk V. M., Khich A. O.**  
Prompting techniques for enhancing the use of large language models
- 286 Yurchak I. Yu., Kychuk O. O., Oksentyuk V. M., Khich A. O.**  
Capabilities and limitations of large language models
