

CONTENTS

- 1 Stefan Jovčić, Libor Bauer**
Evaluating the efficiency of a parcel locker network:
a case study of variable demand and storage duration
in Pardubice city
- 14 Mykola Zhuk, Halyna Pivtorak,
Ivanna Gits, Maryan Hits**
Changes in public transport service
demand under the influence
of seasonal components
- 25 Grzegorz Karoń, Jerzy Mikulski, Ryszard Janecki**
Personalized functional viewpoint of the ITS systems
architecture regarding information for users
of urban transport systems – a case study
for the central city of a metropolis
- 48 Oksana Hulchak, Stanislav Popov,
Liudmyla Nahrebelna,
Alina Korchevska**
Distribution of vehicle speeds in traffic
flow on multilane roads approaching major
and metropolitan cities
- 61 Julia Lesiv, Vitalii Kovalchuk**
Assessment of the accident rate coefficient
at pedestrian railway crossings
- 73 Yaroslav Bolshelarskyi, Mykola Berezovyi,
Piotr Gołębiowski, Oleksandra Orlovska,
Yuriy Tereshchak**
Application of root cause analysis techniques
to enhance passenger safety during boarding
onto multiple-unit rolling stock
- 84 Fedir Abramchuk, Vitaliy Krivda, Olha Sakno,
Valentyna Olishevska, Kostyantyn Kornilenko,
Olena Sakno**
Mathematical modeling of heat and mass transfer
processes in a reciprocating engine of a vehicle
with a hybrid powertrains
- 95 Volodymyr Sakhno, Igor Murovanyi, Andrii Kotenko**
To determination of the stability of an articulated
bus with a self-aligning trailer axle
- 111 AUTHORS**
