

CONTENTS

- 1 Balatska V.S., Poberezhnyk V.O., Stefankiv A.V., Shevchuk Yu.A.**
Development of a method for ensuring the reliability and security of personal data in blockchain systems of state registers
- 15 Berehuliak Y. V., Bachynskyi R. V.**
Mechanism for expanding programming language syntax at compile time
- 24 Bybyk R.T., Nakonechnyi Y.M.**
Research of existing methods for determining spatial and frequency parameters of electronic warfare (ew) sources
- 37 Branovskyi V. V., Mychuda Z.R.**
Development of an automated plant care management system
- 47 Vytrykush V. O., Huzynets N. V.**
Recognizing military equipment from satellite images using ai
- 60 Voronovskyi M. I., Yurchak I. Y.**
Optimizing road traffic through reinforcement learning
- 68 Habrylchuk A.V., Susukailo V. A., Kurii Y. O., Vasylyshyn S. I.**
Analysis of cyber attacks using machine learning on the information security management systems
- 79 Harasymchuk O. I., Voytusik S. S., Tsebak O. A.**
Application of pseudorandom number generators in machine learning
- 91 Horpenyuk A. Y., Luzhetska N. M., Horpenyuk O. A.**
Analysis of the features of using cryptographic algorithms and protocols for uav protection
- 106 Deineka O. R.**
Analysis of current trends and approaches to reliable and secure big data storage
- 119 Dudykevych V. B., Mykytyn H. V., Murak T. Y.**
Complex security system of a regional corporate network based on the osi model and the "defense-in-depth" model
- 131 Ivaniuk O. O., Vakhula A. M.**
Analysis of effectiveness and vulnerabilities of privacy-preserving methods using k-anonymity, l-diversity, and t-closeness as examples
- 143 Ivkova V. S., Opirskyy I. R.**
Research of existing osint tools and approaches in the context of personal and state information security
- 160 Kotliarov O. Y., Bortnik L. L.**
Overview of the fundamental model of security orchestration, automation, and response in the context of cybersecurity of virtual networks
- 176 Kret T. B., Piskozub A. Z., Stasiv P. V.**
Research of compliance with cyber essentials requirements for company's certification
- 186 Maksymiv M. R., Rak T. Y.**
Building and optimizing lightweight generative adversarial neural networks to enhance video quality in the client devices using webgpu
- 195 Maksymovych M. V., Mychuda L. Z.**
Review of modern automated software security testing tools
- 204 Maltsev E. Y., Muliarevych O. V.**
Optimizing communication in highly loaded systems using flagbag method
- 218 Matseniuk Y. V.**
Exploring the effectiveness of using centralized configuration storage to securely manage cloud services infrastructure
- 235 Nyzhnyk A. O., Partyka A. I.**
Development of the concept of a uav detection and neutralization system using interceptor drones
- 247 Onyshkevych T. I., Hlukhov V. S.**
Study of the quantum phase influence on the qubit state in circuits with hadamard gates connected in series
- 261 Syrotynskyi R. M., Tyshyk I. Y.**
Features of network access management of corporate systems in zero trust architecture
- 272 Stepanov O. V., Klym H. I.**
Improving microinterface performance by executing c code in javascript execution environments using bun
- 284 Fedynyshyn T. O., Partyka O. O.**
Analysis of security risks in mobile applications developed with cross-platform frameworks
- 295 Khanin D. O., Otenko V. I.**
Evaluation of deep learning-based super-resolution methods for enhanced facial identification accuracy
- 307 Chura T. R., Kostiv Y. M.**
Adaptation of information security in the agile world
