

CONTENTS

- 1 Bybyk R. T., Nakonechnyi Yu. M.**
Application of pseudorandom number generators in machine learning
- 13 Vakhula O. P., Vorobets P. A.**
Security as Code using Agentic AI: efficiency in ensuring software development lifecycle security
- 26 Voloshyn M. I., Oleksiv M. V.**
The impact of Bluetooth Low Energy interference and MU-MIMO technology on Wi-Fi 5 network performance
- 36 Hodovana M. V.**
User authentication using the AES-GSM algorithm and PBKDF2 function
- 43 Hrytsko T. L., Hlukhov V. S.**
Methods for parallelizing the compression of video streams from earth surface scanners
- 50 Deineka O. R., Harasymchuk O. I.**
Itil as a component for methodology collecting, processing, storing, and classifying data in accordance with SOC2 Type2 requirements
- 60 Zhuravchak Yu. Yu., Zhuravchak D. Yu., Zhuravchak A. Yu.**
Comparison of vulnerability scanners for detecting obfuscated malware in containers
- 71 Ivkova V. S., Oprisky I. R.**
Research into the possibility of integrating the compartmentalization method into the protection of information in open sources
- 84 Klushyn Yu. S.**
Combined control of unmanned aerial vehicles under electronic warfare conditions
- 100 Kotliarov O. Yu., Bortnik L. L.**
Methods for assessing the security of virtual networks and information security maturity models
- 114 Kudriavtsev D. O., Mychuda L. Z.**
Overview of microservice architecture and analysis of typical vulnerabilities
- 122 Maksymiv M. R., Rak T. Y.**
Hardware optimization of video quality improvement methods based on deep neural networks
- 134 Petriv P. P., Nakonechnyi T. I.**
Innovative methods of encryption and storage of database parts in distributed systems based on smart contracts
- 154 Prokopovych-Tkachenko D. I., Khrushkov B. S., Bilan M. V., Cherkasky O. V.**
Intellectual re-engineering technologies in digital transformation of public services
- 167 Pukach A. I., Teslyuk V. M.**
Archimedes spiral-based model for multifactor positioning of complex software support object
- 177 Sapsai O. S., Martseniuk Y. V., Partyka A. I.**
Automate cloud security incident management with a SOAR-based approach
- 193 Syrotynskyi R. M., Tyshyk I. Y.**
Optimizing firewall policy management in microsegmented networks
- 206 Sovyn Y. R., Sokolovskyi M. M., Lukovskyy T. I.**
Efficient construction of bitsliced DES S-Boxes with reduced logical complexity
- 217 Khoma O. V., Yurchak I. Yu., Khich A. O.**
Anomalies detection and traffic monitoring system in computer networks
- 235 Chuiko G. P.**
Symbolic modeling of the quantum Grover search algorithm on two qubits: Quirk + Maple
- 242 Shyryi B. I., Lashko O. L.**
Research and development of software behavioral components in computer gaming systems
